What time is morning tea?	Can you confirm any of rumours regarding the security vulnerabilities and recent issues with the release of hot fixes? There's plenty of room for improvement I reckon.	Are the results from last year any indication of what we should expect this year?
How likely is it that we'll see a major software update in the next 5 years? And do you think this would be an important step?	When do we expect stage 3 to be finalised?	What new products should we expect to see in the next 2 years?
		Do you think the level will go up from here?

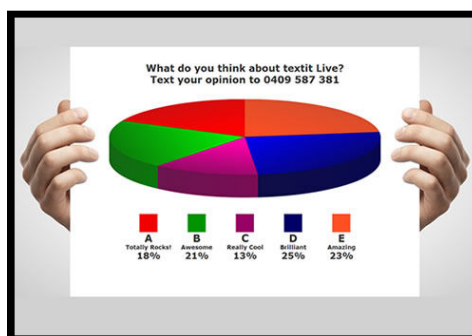

Which of the following tropical holiday destinations would be your first choice for a winter escape this year?
